

Press release

Ad hoc announcement pursuant to Art. 53 LR Vetropack reduces results forecast for the 2025 fiscal year

Bülach, 31 October 2025 – The Vetropack Group, one of Europe’s leading glass packaging manufacturers, expects its result for the current fiscal year of 2025 to be significantly below previous expectations. The reason for this is the persistently difficult market situation in Europe.

Contrary to the previous forecast in its [Semi-annual report](#), Vetropack no longer expects sales and profitability to develop steadily in the current second half of the year, and consolidated profit at the end of the fiscal year will therefore not exceed the figure for the prior year. Net profit is now expected to be in the single-digit million range. The background to this development is the subdued demand situation that continues to persist in the Group's key European core markets.

Vetropack’s Group management has already initiated appropriate measures. Vetropack will increasingly consider temporary shutdowns of individual production lines and furnaces across all its locations. At the beginning of December, therefore, Vetropack will already implement the orderly shutdown of one of the two furnaces at its plant in Chişinău and keep it out of operation for at least half a year. Due to its geographical location and the tense political situation in the region, the Republic of Moldova is entirely dependent on energy imports from Western Europe and has to pay top prices for them.

About Vetropack

The Vetropack Group numbers among Europe’s leading manufacturers of glass packaging for the food and beverage industry, with around 3,600 employees and net sales of CHF 842.1 million in 2024. Vetropack has cutting-edge production plants as well as sales and distribution offices in Switzerland, Austria, the Czech Republic, Croatia, Slovakia, Ukraine, Italy, the Republic of Moldova and Romania.

Through our work, we make it possible for everyone to enjoy food and beverages in the most elegant, safest and most responsible way. This is because glass is a sustainable packaging solution – and the perfect material to ensure that food is packaged safely. Our holistic Service plus+ approach helps our customers to optimise their value chains so they can guarantee consumers' safety. To this end, we endeavour to build close and long-lasting relationships. Guided by our understanding of environmental responsibility and cost efficiency, we aim to minimise our carbon footprint throughout the supply chain, and we are committed to recycling as the key to optimising product life-cycles.
